### Supply Chain Integration

#### Supply Chain Integration for B2B Company

Spearheaded major components of the supply chain integration solution for major B2B Supply Chain eCommerce company. Implemented Oracle Financials and interfaces to various components, e.g. warehousing, third party vendors' systems for parts re-ordering, etc.

Assessed the EDI needs from the ground-up and recommended purchase, performed configuration and customization of EDI software. Designed and Implemented Order Management tool to serve as a portal for Supply-Chain and Fulfillment activities.

Implemented Check Point FW and VPN connectivity to communicate with EDI VAN (GEIS) over TCP/IP. Performed Integration of Web based commerce and traditional EDI translator with TradeSite Server 2.1 for porting EDI documents as Web Forms.

Developed automated interfaces to periodically collect and collate parts information from various suppliers and integrate them into catalogs suitable for ordering on the web.

#### i2-Oracle Apps-Hyperion Interface

Developed Java-based interface between i2 db and Hyperion for product forecasting. This module had a GUI based interface, and performed data conversion between input data from Oracle 8.0 and i2 database, into output in Hyperion format.

#### i2 Oracle Apps Support

Played a significant role in partnering Oracle for providing i2 services at Oracle's customer site. This customer was about to go live with one of the largest Oracle/i2 DP implementations with seven i2 databases. The SecF team was primarily responsible for customizing / configuring / administering the i2 installation and preparing / testing / enhancing i2 Analyzer reports.

As part of the i2 administration duties, the SecF team was also responsible for setting up, administering and supporting i2 Demand Planner and Analyzer on a day to day basis, including activities such as database refreshes / database

synchronization, freeze forecasts, user access modification, troubleshooting, managing reports and bookmarks, using misc. Demand administrator utilities

As part of i2 reports generation, the SecF team developed over 150 i2 reports and bookmarks, interacted with super-users on critical error reports generated including format changes, debugging etc, tested / debugged over 100 i2 reports in beta and gamma (pre go-live) environments, etc.

#### i2 Factory Planner implementation

Responsible for implementation of i2 Factory Planner at major Fortune 500 company. This included integration of SAP with i2 using PP-POI, ALE, IDocs and Rhythm-link. As part of initial planning and design phase of the project performed Supply Chain Opportunity Assessment, High Level system design, process flow and business release planning. As part of the implementation phase, did data mapping, gap/fit analysis and prototyping, user training and roll-out planning.
